

SAP Security Response Names SecurityBridge's Research Lab As Top-3 Worldwide

Joris Van De Vis Appointed Lab's Director

NEW YORK, NEW YORK, UNITED STATES, January 23, 2024 /EINPresswire.com/ -- SecurityBridge, a leading global provider of SAP security solutions, today announced the SAP Security Response Team has rated the SecurityBridge Research Lab among the Top-3 sources for discovering and reporting vulnerabilities in SAP software. The research lab has found and reported over 100 zero-day vulnerabilities that contribute to securing the SAP ecosystem, SAP products, and SAP customer platforms worldwide. This accolade underscores the research lab's exceptional contributions to SAP security and positions SecurityBridge as a crucial partner for those seeking to fortify their SAP installations.

The SecurityBridge Research Lab's involvement extends beyond reporting vulnerabilities and is instrumental in analyzing newly released SAP security notes on [Patch Tuesday](#). These insights contribute to the proactive protection of SAP customers, as SAP patches and detection signatures are seamlessly integrated into the SecurityBridge platform.

A significant development in the research lab's history is the appointment of Joris Van De Vis, SecurityBridge's Director of Security Research and Lab Director. As co-founder of the recently acquired [Protect4S](#) organization, Joris brings more than two decades of SAP security experience and has been credited with identifying over 100 SAP vulnerabilities. While at Protect4S, he was a frequent SAP security speaker at international security conferences, large enterprises, the Dutch government, the Dutch user association VNSG, and SAP's annual security conference. Joris' skills amplify SecurityBridge's capabilities to analyze newly released SAP security notes on Patch Tuesday. These insights further help the lab proactively protect SAP customers.

"The SAP Security Response Team has duly recognized the efforts of the SecurityBridge Research Lab, acknowledging its pivotal role in uncovering vulnerabilities," Joris said. "We are proud the SAP Security Response Team has swiftly created numerous patches to rectify the vulnerabilities our research lab has discovered."

The SecurityBridge platform seamlessly integrates with any SAP environment, and the research lab findings are automatically included within the patches. For more information, please visit securitybridge.com or call +1 (416) 821 0850.

About SecurityBridge, Inc.

SecurityBridge is an SAP Security Platform provider developing tools to extend the SAP ecosystem. The company takes a radically different approach to traditional security solutions, believing SAP applications and custom code will be infiltrated no matter how diligently security hygiene is applied. In response to this belief, SecurityBridge created its integrated real-time solution for constant monitoring. Powered by anomaly detection, the SecurityBridge platform can differentiate between accurate results and false positives so that security teams can better focus on real issues.
