# Leading Security-Testing Lab AV-Comparatives Presents Overview of Certified IT Security Products

An actual guide to security software vendors with a certification from AV-Comparatives, ensuring efficient offerings for individuals and businesses.

INNSBRUCK, TYROL, AUSTRIA, February 29, 2024 /EINPresswire.com/ -- In an era when digital threats are constantly multiplying and evolving, it's more important than ever to find security products that can keep up with them. A myriad of options is available, all of which make great claims about their own effectiveness. It can be hard to work your way through all of the different antivirus and other security programs on offer.

AV-Comparatives Presents Overview of Certified Products for Windows

Recognizing this need for clarity, <u>AV-Comparatives</u> is proud to present the "<u>IT Security Products Overview</u>". This provides an at-a-glance guide to current security-software manufacturers who hold a certificate from AV-Comparatives assuring effective products for Microsoft Windows, in both home-user and enterprise categories. This is a valuable aid to negotiating the maze of security products, and finding a reputable product that is right for your needs.

> " Explore the IT Security Products Overview today and fortify your digital defences with confidence."

AV-Comparatives has been conducting industry-leading, rigorous <u>independent tests</u> of antivirus and other security software for over 20 years. For both consumer and business products, the Austrian institute conducts a Main-Test Series. To check the all-round effectiveness of the solutions, four separate tests are conducted. These cover protection against Internet-based threats, protection against malicious programs on external drives and network

shares, false alarms, and impact on system speed. An Endpoint Prevention and Response (EPR) Test is also conducted for applicable enterprise products.

AV-Comparatives invites IT-Security vendors to its certification Process. https://www.av-comparatives.org/contact/

To be certified in the Consumer Main-Test Series, Business Main-Test Series, or EPR Test, products must reach a high standard in all aspects of the test or series. Certification by AV-Comparatives is thus a guarantee that a security solution genuinely lives up to its manufacturer's claims. The list of 50 products indicates which ones have a current certification (valid for one year), ensuring that users have up-to-date information on which to base their decisions. This is critical in an IT-security landscape that is constantly changing. Vendors with past certifications are also included for readers' information.

AV-Comparatives believe that staying informed about the latest advancements in IT security is crucial for adapting to the ever-changing threat landscape, and its IT Security Products Overview is provided to guide on that journey. For those seeking more details of certified products, AV-Comparatives' website offers detailed reports of all the individual tests and the respective results achieved by each of the tested products. These can further assist in finding the right product.

Tests of security products for other platforms such as Mac and Android, and other product types such as VPNs, are also provided by AV-Comparatives. Again, detailed test reports can be found on the institute's website. AV-Comparatives remains committed to providing valuable insights and resources to empower individuals and businesses in their pursuit of robust cybersecurity.

About
AV-Comparatives is an independent organisation offering systematic testing to examine the efficacy of security software products and mobile security solutions. Using one of the largest sample collection systems worldwide, it has created a real-world environment for truly accurate testing. AV-Comparatives offers freely accessible av-test results to individuals, news organisations and scientific institutions. Certification by AV-Comparatives provides a globally recognised official seal of approval for software performance.
