According to HTF Market Intelligence, the Global Electric Kick Scooters market to witness a CAGR of % during forecast period of 2024-2030. The market is segmented by Application (Personal, Commercial) by Type (Consumer Electric Kick Scooters, Foldable Electric Scooters, Off-Road Electric Scooters, Others) by Battery (Lead Acid, Lithium Ion (Li-Ion), Others) by Drive Type (Belt Drive, Chain Drive, Hub Drive)

Definition:

Electric kick scooters, often referred to as e-scooters or electric scooters, are compact and lightweight personal transportation devices equipped with an electric motor for propulsion. These scooters combine the convenience of traditional kick scooters with electric power, allowing users to cover short distances quickly and easily without the need for physical exertion. They have gained popularity as a last-mile transportation solution in urban areas and are commonly used for short commutes, leisure rides, and navigating city streets. Electric kick scooters offer an eco-friendly and efficient way to cover short distances, reduce traffic congestion, and decrease the carbon footprint associated with urban transportation. However, as with any mode of transportation, riders should prioritize safety by wearing helmets, following traffic rules, and riding defensively.

Major Highlights of the Electric Kick Scooters Market report released by HTF MI:

Market Breakdown by Application (Personal, Commercial) by Type (Consumer Electric Kick Scooters, Foldable Electric Scooters, Off-Road Electric Scooters, Others) by Battery (Lead Acid, Lithium Ion (Li-Ion), Others) by Drive Type (Belt Drive, Chain Drive, Hub Drive) and by Geography (North America, South America, Europe, Asia Pacific, MEA)

Global Electric Kick Scooters market report highlights information regarding the current and future industry trends, growth patterns, as well as it offers business strategies to help the stakeholders in making sound decisions that may help to ensure the profit trajectory over the forecast years.
