The on-board charger refers to a device or energy supply system that is built for the vehicle to charge the traction battery of an electric vehicle (EV) or hybrid electric vehicle (HEV). The primary purpose of an on-board charger (OBC) is to transfer and manage the flow of electricity from the power grid to the battery. This onboard charger (OBC) allows the battery to get recharged from the AC mains at home or from outlets found in private or public charging stations, which provides constant current or voltage charging.
