Book.io Revolutionizes Access to Sacred Texts by Putting Bible, Quran, and Tanakh on the Blockchain

MCKINNEY, TX, UNITED STATES, January 25, 2024 /EINPresswire.com/ -- Book.io, the world's leader in web3 publishing, is putting the Bible, the Quran, and the Tanakh onto the Cardano blockchain. This innovative step ensures that these crucial religious texts become unburnable, unbannable, and unchangeable, preserving them for future generations.

Three major religious texts being released on the blockchain.

In an era where censorship and challenges to freedom of expression abound, Book.io is committed to providing a secure and immutable platform for the world's books. By leveraging blockchain technology, the company aims to safeguard these works from any form of alteration, suppression, or restriction.

The move to put the Bible, Quran, and Tanakh on the blockchain means that these texts are now truly unburnable. In an age where physical copies can be targeted for destruction, the digital preservation on the blockchain ensures that the words of these sacred scriptures cannot be erased, or changed, by any means.

"It's crucial to highlight that this does not imply religious endorsement. Instead, it signifies our faith in the significance of knowledge and the value of having access to a diverse range of literature," added Joshua Stone, CEO of Book.io.

Furthermore, Book.io's commitment to making these texts unbannable means that access to the Bible, Quran, and Tanakh will not be subject to geopolitical or ideological restrictions. The decentralized nature of the blockchain guarantees that users across the globe can freely engage with these religious texts without fear of censorship.

Book.io believes in fostering a global community that appreciates and understands diverse

cultures and beliefs. By placing the Bible, Quran, and Tanakh on the blockchain, the platform seeks to break down barriers to access, enabling people from different backgrounds to explore and engage with these profound texts and new ideas.

This initiative aligns with Book.io's broader mission of decentralizing knowledge and making information universally accessible. The blockchain integration ensures that individuals in regions with limited access to physical copies or facing censorship challenges can still have access to important works.

Book.io's move to put the Bible, Quran, and Tanakh on the blockchain is a testament to its dedication to advancing the accessibility, security, and preservation of knowledge. The company envisions a future where the blockchain becomes a standard for safeguarding literature, audiobooks, and other digital media, creating a global repository of information resistant to censorship and manipulation.

About Book.io
Book.io has revolutionized the digital publishing world for creators and owners, selling ebooks and audiobooks on Cardano, Ethereum, Algorand, and Polygon blockchains. Their proprietary technology allows users to own, read, resell, and share these digital assets. Headquartered in McKinney, TX, Book.io was founded in 2022.
