

UMEX 2024 - Milanion Ink MOU with AI Seer Marine for 'Made in UAE' Unmanned Systems

ABU DHABI, UAE, January 25, 2024 /EINPresswire.com/ -- Milanion, through its UAE entity, signed a memorandum of understanding (MoU) with UAE-based AI Seer Marine to work on strategic opportunities within the local market for the development, promotion, and sales of [unmanned ground vehicles](#) (UGV), aligning with local 'Made in UAE' manufacturing.

Under the newly inked MoU, both companies commit to expanding their collaboration internationally, to offer various customisable solutions to meet customers' requirements for both land and maritime capabilities.

This collaboration marks part of the growing Unmanned Ground Vehicle market estimated at USD 2.56 Billion in 2024 and is expected to reach USD 4.91 billion by 2029, growing at a CAGR of 13.87% during the forecast period (2024-2029).

The agreement will draw on both companies' recognised market leadership, expertise, and experience in their respective areas of focus. Milanion in the design, development, and manufacture of advanced [autonomous technology](#) systems and platforms, and AI Seer Marine's rich craftsmanship and engineering heritage in the design, manufacturing, and maintenance of maritime assets.

Mitesh Purohit, Vice President of Sales at [Milanion Technologies](#), said "AI Seer Marine is a global leading maritime company, with a reputation for quality and excellence. We look forward to expanding our working relationship to unlock opportunities in both land and maritime domains, on a local and international level".

"The cooperation with Milanion is a key relationship for AI Seer Marine," said Travis Knowles,

Head of Unmanned Systems of Al Seer Marine. "This collaboration is a testament to the complementary strengths of our two companies. By bringing together our respective areas of expertise, we are confident that we can create new and innovative solutions that will enhance customer capabilities".

-Ends-

About Milanion

Milanion is an integrated technology company that supports the challenges of the modern battlefield, with in-demand, in-service, and battle-ready products for the tri-service defence and security sectors. The company develops, manufactures, and brings to market, advanced systems engineered to provide highly mobile, automated solutions, designed to support multi-mission capabilities through manned, autonomous, or remote operation. Equipped with intelligent communication and control systems for land, maritime and air use our product portfolio boasts sophisticated, modular 'plug and play' systems designed to provide platform-agnostic solutions that are affordable, simple to operate, provide interoperability with a range of systems and easily configured to mission requirement.
