Key Highlights of Momar's Enhanced Barrier Lamination Platform:

Diverse Product Range: Momar's expanded lineup of metallized film lamination products offers versatility and adaptability, catering to the unique barrier needs of different applications.

Wide Market Reach: Momar's high barrier metallized film laminations expand its addressable market to packaging applications in a multitude of sectors, including food, pet care, health & nutrition, coffee, nuts, chemicals, resins, automotive, and more. This extensive market coverage reflects Momar's commitment to providing solutions that meet the evolving requirements of various industries.

Application and Structure Flexibility: The new metallized barrier film laminations from Momar are designed to serve a multitude of functions, such as pouch and bag applications, rollstock lidding, and pre-cut lids. This versatility allows Momar's clients to tailor their packaging solutions to suit their specific needs.

"Momar has always been committed to staying at the forefront of barrier packaging technology. Our long-standing expertise, combined with our commitment to innovation, has led us to this remarkable development in our barrier lamination platform," said Phil Dabbert, VP of Business Development at Momar. "Our metallized film laminations, with high barrier properties and customization options, reflect our dedication to providing high-quality, tailored solutions for our clients across diverse industries."

With this strategic expansion of its barrier lamination capabilities, Momar continues to set the standard in the flexible packaging industry, ensuring that clients have access to the most advanced and reliable solutions available.
