

# Thompson Builders Completes \$20.6M San Joaquin Public Health Services Building, Elevating Community Healthcare Landscape

SAN JOAQUIN, CALIFORNIA, UNITED STATES, January 26, 2024

/EINPresswire.com/ -- [Thompson Builders](#)

is delighted to announce the successful completion of the San Joaquin Public Health Services Building, a project that sets new standards for public health infrastructure. This state-of-the-art facility, strategically designed to meet the community's evolving needs, comprises 24,500 square feet of modern administrative office space and 5,800 square feet of advanced laboratory facilities, contributing significantly to the prevention, control, and diagnosis of various public health concerns.

Initiated during the height of the COVID-19 pandemic, the San Joaquin Public Health Services Building project posed unprecedented challenges. Despite the complexities, the Thompson team demonstrated exceptional resilience, successfully navigating and implementing stringent COVID protocols while ensuring the safety and well-being of all personnel involved. The facility provided uninterrupted public health testing services for San Joaquin and Stanislaus counties throughout the construction process.

In addition to the advanced facilities, Thompson Builders undertook [extensive site work](#),

New San Joaquin Public Health Services Building

San Joaquin Public Health Services Building Bioswale

including demolishing the existing Public Health Services Facility to create new parking spaces for both staff and the public. This thoughtful inclusion enhances accessibility and convenience for visitors to the facility. This \$20.6 million initiative is not just a construction project but a replacement project aimed at optimizing space and resources. With a reduction in usable assignable square footage (ASF) and a decrease in occupant load, Thompson Builders demonstrates a commitment to sustainability and efficiency in healthcare infrastructure. One sustainability aspect of this project includes the 2,500 square foot bioswale, located next to the parking lot and designed to convey stormwater runoff, remove debris and pollution, and recharge groundwater.

New Laboratory - San Joaquin Public Health Services Building

Thompson Builders takes pride in contributing to the community's well-being through the completion of this transformative project. The San Joaquin Public Health Services Building stands as a testament to the company's [dedication to excellence](#), innovation, and the enhancement of healthcare infrastructure.

To understand the historical significance and importance of the San Joaquin Public Health Services Building, interested parties can explore the detailed information available on the San Joaquin County Public Health Services website: <https://www.sjcphs.org/>. The website offers valuable insights into the history of the building, emphasizing its role in advancing public health initiatives in the region.
