Indoor Ag-Con 2024

strategic advice and financial guidance to senior executives and boards on partnerships and growth strategies.

The year 2023 presented formidable challenges for indoor farming, witnessing a notable decline in capital investment and an increase in corporate bankruptcies. During his keynote presentation, Bergman will shed light on the resilience of the indoor farming industry and its potential for rapid growth. Discover how indoor farming, driven by mega trends in food security and sustainability, is positioned for success. Climate change is making outdoor farming, especially for specialty crops, more challenging, making indoor farming an attractive alternative. Bergman will highlight new areas of growth, including expansion of crop production into higher-margin produce, pharmaceuticals, and specialty ingredients. Attendees will gain insights into leveraging the USDA loan program, other non-dilutive sources of capital to secure funding and more -- enabling sustainable growth in the indoor farming sector.

"Embracing the future of agriculture is not just a keynote address for me; it's a personal passion with a call to cultivate innovation and sustainability in this ever-evolving industry where AgTech transforms the fields of possibility for food production," said Adam Bergman, Managing Director, Clean Energy Transition Group, Global Head of AgTech for Citi. "I look forward to connecting with Indoor Ag-Con's attendees and exhibitors, offering my decades long experience and lessons learned."

"As one of the first investment bankers to focus exclusively on the CleanTech sector, Bergman is an ideal speaker for Indoor Ag-Con bringing a new level of expertise that combines finance, technology and sustainability," said Brian Sullivan, CEO Indoor Ag-Con. "His deep understanding of finance and his commitment to 'green' practices make him a perfect fit for our conference. Attendees can expect to gain valuable insights into the financial dynamics shaping the future of indoor agriculture."

In addition to Indoor Ag-Con's Keynotes, the event will feature educational panels, debates and other presentation formats aligned in several Conference tracks. Attendees will also enjoy quality networking events and explore an expanded expo floor bringing together 200+ suppliers and service providers representing the top names and emerging leaders in the controlled environment agriculture sector. For more information on the full line-up of sessions, exhibitors and events, please visit www.indoor.ag.

ABOUT:

Founded in 2013, Indoor Ag-Con has emerged as the largest trade show and conference for vertical farming | greenhouse | controlled environment agriculture. Its events are crop-agnostic and touch all sectors of the business, covering produce, legal cannabis | hemp, alternate protein and non-food crops. More information, visit www.indoor.ag.
