Breast implants are breast-shaped bags constructed of a silicone outer shell and filled with silicone gel or saline, and they used to change the size, shape, and form of the breasts.

The main types of breast implants are silicone implant, form-stable implant, saline implant, and structured saline implant. The silicone implant is filled with silicone gel. The silicone gel has a similar texture to genuine breast tissue. They are used by hospital, cosmetology clinic, and other end users in breast augmentation and breast reconstruction procedures.
