

BLOK INC: Announces New Cryptocurrency-based Real Estate Investment Platform

Seamless fractional ownership, secure crypto insurance, and professionally-managed strategies.

TORONTO, ONTARIO, CANADA, January 30, 2024 /EINPresswire.com/ -- In today's complex and expensive [real estate](#) investment landscape, BLOK INC is using cutting-edge blockchain technology to make real estate ownership accessible and empower passive income generation through cryptocurrency.

Investing in real estate has traditionally been limited to those with significant capital or local knowledge. However, with BLOK REALTY's Fractional Real

Estate Investment, the doors to the US, UK, and South American real estate markets have been opened for investors worldwide. Through tokenized ownership, investors can now own a fraction of a property, with each token backed by the asset itself. This unique approach allows investors

to earn weekly rental income and trade their tokens on the open market, providing liquidity and flexibility like never before.

Terms and conditions apply, prices are subject to change, and APRs are subject to change. Crypto insurance is provided by a third party, which is a decentralized community. By using the Capital Model, capital is available to back risks at all times, while the voting mechanism ensures that claims are handled in a permission-less and transparent manner. The prices are in US dollars and are for the duration of the policy.
