SHERIDAN, WY, UNITED STATES,
January 30, 2024 /EINPresswire.com/ --

In Asia Pacific, copper wire prices surged in Q1 2023 due to robust market sentiments, increased inquiries, and reduced production during the Spring festival break. Government policies in Q2 further elevated production costs. However, global economic downturn, European bans on Chinese goods, and sluggish consumption impacted Q2's latter half. In Europe, Q1 saw rising copper wire demand and feedstock prices due to banking crises. Q2 prices stabilized as supply and demand balanced, but inflation and global economic decline negatively affected trends. North America faced copper wire price pressure from interest rate hikes, Silicon Valley bank failures, and reduced demand, particularly in Q2 due to economic uncertainties and debt crises.
