

# Integrated Electronics Parts Expands Its Electronic & Aviation Offerings to Meet Industry Growth

*Integrated Electronics Parts announces an expansion to its aviation and electronic offerings, a move to meet the increasing demands of diverse markets.*

CALIFORNIA, ANAHEIM, UNITED STATES, February 5, 2024

/EINPresswire.com/ -- Integrated Electronics Parts, a distinguished purchasing platform owned and operated by ASAP Semiconductor, proudly announces an expansion of its

[electronic and aviation part offerings](#). This strategic move has been made to meet the quickly evolving needs of the aerospace and electronic sectors, bolstering the company's commitment to presenting a comprehensive and diverse range of high-quality components to support varying endeavors.

“

Strategically expanding our inventory to meet industry demands, we proudly provide quality solutions for the aerospace and electronic sectors, effortlessly meeting even the most rigorous requirements.”

*Joe Faruqui*

In an era where technological advancements drive industries of all types, Integrated Electronics Parts is taking a bold step by broadening its product portfolio based on market insights, strategic partnerships, and more. With a keen focus on innovation, reliability, and customer satisfaction, the company aims to play a pivotal role in supporting the evolution and development of these dynamic sectors.

Integrated Electronics Parts recognizes the intricate needs and challenges faced by professionals in the aerospace

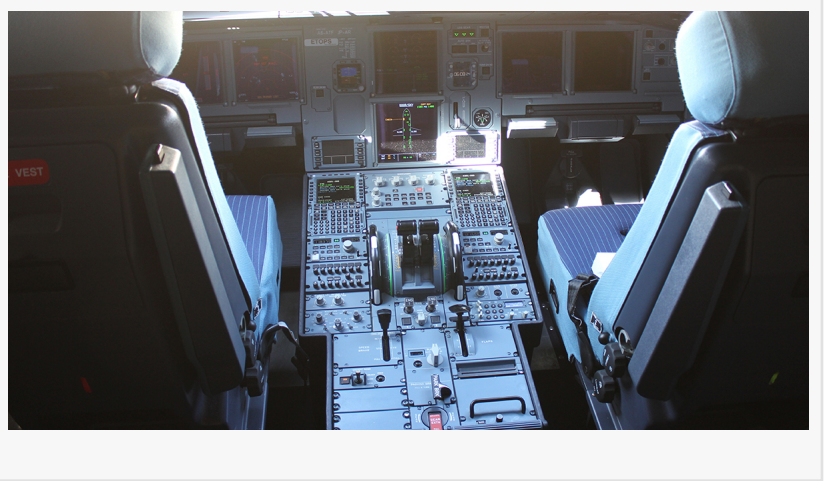

industry, and the [expanded aerospace parts catalog](#) includes a comprehensive selection of components critical for such needs. From avionics to airframe and engine parts, the company ensures that customers have access to top-tier components sourced from leading manufacturers and suppliers across the globe. Rigorous testing and quality assurance processes

are also in place to guarantee compliance and reliability.

In addition to aerospace parts, Integrated Electronics Parts has introduced an extended range of [electronic and electrical components](#). This includes semiconductors, resistors, capacitors, connectors, and other critical electronic elements that ensure device functionality and smooth operations. As the electronic industry continues to advance with new technologies, Integrated Electronics Parts aims to be at the forefront by offering components that meet the highest standards of performance and reliability.

Integrated Electronics Parts adheres to stringent industry regulations and quality standards, operating with AS9120B, ISO 9001:2015, and FAA AC 00-56B accreditation as a result of its practices. This includes the testing and inspection of all inventory offerings, as well as the supply of all applicable qualifying certifications and manufacturing trace documentation for purchased items. The company also exceeds regulatory guidelines for export compliance and quality assurance, instilling confidence in customers regarding the authenticity and reliability of the components they procure.

Integrated Electronics Parts is not merely expanding its inventory; the company is also enhancing its procurement services to align with the evolving needs of aerospace and electronic professionals. To do this, Integrated Electronics Parts presents a streamlined and modernized purchasing platform that facilitates efficient navigation and quick access to any required components. A collection of curated catalogs, as well as a provided search engine with filters, guarantee that professionals can save valuable time and resources to alleviate the typical stresses associated with the parts procurement process.

To present rapid fulfillment and competitive pricing for aerospace and electronic parts, Integrated Electronics Parts takes advantage of a global supply chain and strong supplier relationships. Based on the time constraints of customers and market availability, customers may even be treated to expedited shipping options or next-day delivery, and they are encouraged to speak with the experts at Integrated Electronics Parts to learn more.

To effectively address customers needs, Integrated Electronics Parts has adopted a customer-centric approach for its distribution services, providing dedicated account managers for customized assistance. For those seeking quotes on desired items, the company's website has an online RFQ service where responses from team members are provided within 15 minutes of reviewing a completed form. This commitment to rapid response times and one-on-one

consultation ensures that customers receive the support they need to keep their operations running smoothly.

As Integrated Electronics Parts expands its electronic and aviation part offerings to meet industry growth, the company is poised to make a significant impact in the aerospace and electronics sectors. By combining innovation, a comprehensive inventory, global reach, and a customer-centric approach, Integrated Electronics Parts stands as a reliable partner for professionals seeking excellence in parts procurement.
