Significantly improve acne scars and wrinkles with a series of quick, 15 to 20-minute treatments, with low to no downtime.

Address a range of benign pigmented lesions with flexibility in depth and spot size.

Treat a wide range of tattoos. Even difficult-to-treat blue and green tattoos.

PicoWay® Resolve and PicoWay® Resolve Fusion are fractional, split-beam treatments available on the PicoWay®

system. Click [HERE](#) to see a Resolve Treatment Guide with treatment videos to learn more about this popular, low-downtime treatment to address acne scars, wrinkles, and benign pigmented lesions.

"I am thrilled to be the first office in the Chico area to introduce the PicoWay® system to our patients. The PicoWay® represents a significant advancement in the treatment of skin imperfections," said Nurse Practitioner [Veronica Silvestri](#). "As soon as this device was made available, I knew it was a must-have for our office," she added.

The PicoWay® laser treatment stimulates collagen at a deeper level by utilizing three distinct energy wavelengths to address specific skin concerns. This is in contrast to an IPL treatment which employs a wider range of wavelengths. While IPL can be effective in certain cases, it may not be as safe for darker skin types and does not stimulate collagen in the same manner.
