

Air scrubber Market is Expected to be the Fastest Growing Segment to Reach a CAGR of 8.5% by 2030

The utilization of air scrubber in hospitals, construction sites and many more, has increased due to increase in concern about human health.

WILMINGTON, DELAWARE, February 6,

2024 /EINPresswire.com/ -- An air

scrubber eliminates air pollution,

volatile organic compounds (VOCs),

surface pollutants, pet dander, smells,

and dust. The air scrubber continually

creates negative ions as air passes

through the ducting system. Those

negative ions are dispatched to locate and return contaminants floating in air that are too tiny to be caught by a standard air filter.

According to a new report published by Allied Market Research, titled, the global [air scrubber market](#) size was valued at \$1,883.3 million in 2020, and is projected to reach \$4,306.4 million by 2030, registering a CAGR of 8.5% from 2021 to 2030.

However, increasing investments and supporting government policies and programs to comply with air quality index standards and greenhouse gas emission limits are also projected to boost air scrubber market growth during the forecast period. For instance, in May 2019, Germany has enacted a national air pollution management program that mandates national emission reductions by 2030, including fine particulate matter reductions and the SLCP black carbon standard.

In addition, Germany has established 58 low-emission zones in over 70 cities, resulting in a considerable reduction in the number of older, polluting cars on the road. Hence, these initiatives will focus on clean air and hence, are expected to provide opportunities and growth in

the air scrubber industry during the forecast period.

Key Players:

Key companies profiled in the air scrubber report include Advanced Air Technologies Inc., Amaircare Corporation, Camfil AB, Croll Reynolds, Inc., Daikin Industries, Ltd., Honeywell International, Inc., Novatek Corporation, Parker Hannifin Corporation, SPX Corporation, Waves Aircon Pvt. Ltd.

Key Findings Of The Study

- The report provides an extensive analysis of the current and emerging air scrubber market trends and dynamics.
- Depending on product type, the wet segment dominated the market, in terms of revenue in 2020.
- By end user industry, the metal processing registered highest revenue in 2020.
- Asia-Pacific is projected to register highest growth rate in the coming years.
- The report provides an extensive analysis of the current trends and emerging air scrubber market opportunities.
- In-depth air scrubber market analysis is conducted by constructing estimations for the key segments between 2021 and 2030.
- The key players within the air scrubber market are profiled in this report, and their strategies are analyzed thoroughly, which help understand competitive outlook of the air scrubber industry.
