

# Flower Turbines Current Funding Round Passes \$4 Million

*Flower Turbines, an innovative wind turbine company, has passed \$4 Million Raised in its current RegA+ offering, closing Feb. 22, 2024.*

LUBBOCK, TEXAS, UNITED STATES, February 6, 2024 /EINPresswire.com/ -- [Flower Turbines](https://www.investflowerturbines.com/) passed \$4 million in funds raised in the current Series A round through equity crowdfunding Regulation A at <https://www.investflowerturbines.com/>. The round closes on Feb. 22. This is its fourth raise and two of the previous raises were sold out. The total raised is now \$15 million.

Flower Turbines is a US company with an important branch in the EU that has the goal of making small wind as powerful a force in renewable energy as solar by using its multiple patents to create a wind turbine that meets all the needs of urban and suburban environments. It combines aerodynamic innovations with beautiful design, low noise, and bird friendliness. Unlike other turbines, they make each other perform better when tightly packed together.

[Technology](#) being developed by Flower Turbines enables a new model in the small wind industry. Focused on

Flower Turbines Raise Passes \$4M

Bouquet of Wind Tulip Turbines

creating beautiful, affordable, and efficient turbines for the urban/suburban market and tight spaces, it seeks to pave the way for the future of distributed energy, particularly with solar. Its "Cluster Effect" (whereby their turbines perform better when tightly packed together as opposed to the most common turbines which perform worse when tightly packed) could give them a key advantage to scaling farms of small wind turbines and harnessing the electricity they produce.

"We have the ambition to become a major global force in distributed energy," said CEO Dr. Daniel Farb. "We believe we have the technology and enthusiasm to accomplish it. We are in the right industry at the right time. Incentives for an energy transition in most important areas of the world only add to our scaling up headwinds."

Flower Turbines has external validation as a top company:

- Flower Turbines has been awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website:

<https://solarimpulse.com/efficient-solutions/wind-tulips#>

- Flower Turbines was a winner of Pepperdine Graziado Business Schools annual Most Fundable Companies in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.

- Winner of the Dutch government sustainability award for two separate years.

This shows how each turbine produces more energy as another turbine is clustered. 5 Flower Turbines together produce 228% more power than 5 separate turbines.
