

InventionHome® Inventor Creates Specialized Cover to Protect Drywall and Prevent it from Drying Out

MONROEVILLE, PA, USA, February 6, 2024 /EINPresswire.com/ --

Jonathan F. of Tucson, AZ is the creator of the Drywall Mud Pan Cover, a sliding metal lid for application to a standard 12- or 14-inch mud pan. The lid protects drywall mud and prevents it from quickly drying out, maintaining its damp structure for easy application to a wall. The cover helps prevent the mud from drying out prematurely and ensuring it can be applied properly for longer periods of time, reducing the amount of wasted material. There is a non-slip material on the top of the lid for convenient grip when sliding the lid on and off.

The cover allows users to take their time in applying the mud rather than worrying about it drying and becoming unusable, ensuring builders can

maintain professional application. It provides users with the convenience of easily transporting smaller amounts of drywall mud without having to take an entire box or bucket full with them for smaller repairs. The pan cover offers a much less strenuous method of transportation for smaller portions of the mud.

Currently, several methods are available to protect drywall mud and prevent it from drying out; however, none of the devices or methods are foolproof and often still lead to a portion of the mud being rendered unusable. Builders typically opt to use plastic wrap, a lid for the mud bucket, or even resealable bags to protect their mud. A specialized device is necessary to protect the mud, and the Drywall Mud Pan Cover is the perfect, most versatile option to fill this niche.

Jonathan filed his Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](#), a leading invention licensing firm, to sell or license the patent rights to his Drywall Mud Pan Cover product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this product innovation.

Companies interested in the Drywall Mud Pan Cover can contact InventionHome at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

About InventionHome®

InventionHome is a leading invention and product licensing firm focused on helping inventors and entrepreneurs through the invention and patent process with the goal of licensing or wholesaling client inventions.
