

Ennov acquires Calyx's Enterprise Technology Division & consolidates its unified Life Sciences compliance cloud platform

The acquisition of Calyx's Enterprise Technology by Ennov marks a significant leap in creating the ultimate cloud-based compliance platform for Life Sciences.

PARIS, FRANCE, February 8, 2024 /EINPresswire.com/ -- [Ennov](#), the provider of the only unified

Olivier Pâris, Ennov's CEO

compliance platform for Life Sciences – a highly configurable software architecture that provides a consistent user experience and eliminates data silos – is pleased to announce the strategic acquisition of the 'Enterprise Technology' division from [Calyx](#). This significant move marks a new chapter in Ennov's commitment to delivering comprehensive and cutting-edge solutions that meet the evolving needs of the life sciences sector.

Calyx Enterprise Technology, legally separated from Parexel in 2021, is a provider of mission-critical eClinical and eRegulatory solutions. Calyx Enterprise Technology has global operations (primarily in the US and UK/EU) servicing blue-chip pharma with long-standing relationships as well as middle-sized biotechs and CROs. With over 60,000 studies carried out, involving more than 140,000 patients and more than 1 million submissions, Calyx Enterprise Technology has been providing long-term solutions to leading global drug development companies.

The acquisition of 'Enterprise Technology' is a strategic action that aligns seamlessly with Ennov's strategy of offering the only unified, robust, and cost-effective cloud-based platform for compliance solutions - quality, regulatory, pharmacovigilance, clinical, and transparency management - in the Life Sciences market. By integrating 'Enterprise Technology' into its portfolio, Ennov is set to offer a broader range of solutions that drive efficiency, compliance, and innovation for life sciences organizations worldwide, from small to medium size to Top Tier Global clients.

"Our mission at Ennov has always been to empower life sciences organizations with the most efficient and compliant software solutions," said Olivier Pâris, President of Ennov. "The acquisition of 'Enterprise Technology' from Calyx is a testament to our commitment to this mission. This move expands our global footprint, reinforcing our position as a key life sciences

software industry player." We were looking to build on the long-term development of our solutions and offer our customers the most attractive prospects, working with a reliable partner who is committed to the sector and technologically advanced. "With Ennov, we are confident we have met our match" confirmed David Herron, CEO of Calyx.

'Enterprise Technology' brings to Ennov a suite of advanced solutions that complement Ennov's existing product range, offering clients an even more comprehensive set of tools to navigate the complex regulatory landscape. The integration of this technology will provide clients with seamless access to a wider array of services, from clinical trial management to regulatory submissions and beyond.

The acquisition is expected to be completed by March 31, subject to customary closing conditions. Following the acquisition, Ennov plans to integrate 'Enterprise Technology' into its operations while ensuring a smooth transition for clients and employees. This integration will leverage the strengths of both organizations to deliver enhanced value and support to clients worldwide.

Ennov was advised by Advance Capital as a Transaction Service firm and by Levine Keszler (M&A Global & France), Keystone Law (UK), Manatt (USA), S&R Associates (India), and DJS Avocats (France),

Calyx was advised by Crosstree as its exclusive financial advisor.
