The report also sheds light on the present scenario and upcoming trends & developments that are contributing to the growth of the market. Moreover, restraints and challenges that hold power to obstruct the market growth are also profiled in the report along with the Porter's five forces analysis of the market to elucidate factors such as competitive landscape, bargaining power of buyers & suppliers, threats of new players, and emergence of substitutes in the market.

Impact of COVID-19 on the Global Spring Water Industry

Sales of spring water is directly proportional to the demand from consumer goods industry. However, the consumer goods sector was negatively impacted by the COVID-19 pandemic that affected the production and demand for spring water market share due to disrupted supply chain.

COVID-19 impacted almost all industries and the spring water producing companies ceased their operations owing to import-export restrictions, lockdown imposed across several countries, shortage of labor; and the fear of contracting the novel coronavirus led to sluggish demand in the market.

Social distancing norms, closed borders, and production constraints due to the pandemic across various countries such as China, India, and the U.S. have affected the global market.

Key Findings of the Study

By packaging type, the bottled segment emerged as the global leader in 2021 and canned segment is anticipated to be the fastest growing segment during the forecast period.

By distribution channel, the specialty stores segment emerged as the global leader in 2021 and hypermarkets/supermarkets appliances segment is anticipated to show the fastest growth in the upcoming years.

By region, the Europe market registered the highest market share in 2021 and Asia-Pacific is anticipated to show the fastest growth during the forecast period.
