Our Mesothelioma Options Help Centers have a network of top doctors and surgeons from coast to coast.

patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2024 were exposed decades ago. www.mesotheliomaoptions.com

Asbestos was used throughout the state of Texas for most of the twentieth century. Major Texas industries where workers faced an elevated risk of asbestos exposure include, but are not limited to, the oil, chemical, manufacturing and shipbuilding industries. Additionally, the wide use of asbestos in the military exposed thousands at military bases around the state.
