

# Findability Sciences launches Business Process Co-Pilots to transform complex business operations with AI

*As a Co-Pilot for business processes, this AI solutions ensures unmatched efficiency, speed, accuracy, and innovation with guaranteed ROI.*

BOSTON, MA, UNITED STATES, February 13, 2024 /EINPresswire.com/ -- Findability Sciences, a

Our Business Process Co-Pilots are a unique suite of solutions that will reshape how business processes function. By harnessing AI's power, we are transforming business ecosystems."

*Anand Mahurkar, CEO,  
Findability Sciences*

global provider of Artificial Intelligence (AI) products and solutions, has announced the launch of its innovative suite of Business Process Co-Pilots (BPCs). These Business Process Co-Pilots are pioneering tools in their field, utilizing a comprehensive array of AI technologies, including both Discriminative and Generative models, underpinned by a solid framework of data management and governance.

Designed to serve as intelligent Co-Pilots for business processes, these game-changing AI solutions offer unparalleled efficiency, speed, accuracy, and innovation, with guaranteed ROI for various critical functions across

industries. Findability Sciences' BPCs leverage technology to help navigate complex business processes there by unlocking approximately 30% - 50% reduction in human efforts and millions of dollars in operational expenses.

Anand Mahurkar, CEO of Findability Sciences, shared his insights. "Our Business Process Co-Pilots are a unique suite of solutions that will reshape how business processes function. By harnessing AI's power, we are transforming business ecosystems and not just offering merely technological tools. We are providing our clients with robust co-pilots that drive innovation and redefine business processes while enabling employees to focus on more strategic activities, enhancing productivity, and minimizing operational costs. Findability Sciences' BPCs are a groundbreaking innovation that will benefit every medium and large business, irrespective of the industry."

With the potential to grow multifold, BPCs are primarily beneficial for companies that have complex human-centric business processes that involve unstructured data and skilled labor. On the back of its global launch, Findability Sciences expects a 50%+ growth in BPC implementations

across industries.

BPCs offer versatile solutions that transcend industry boundaries, providing crucial support to a diverse array of business sectors in addressing some of the most pressing business challenges. Catering primarily to the manufacturing, retail, BFSI, healthcare, and pharma industries, Findability Sciences' BPCs will ensure complex business processes are no more just a responsibility of skilled labor, but they have an able co-pilot to perform the tasks better, cheaper and faster.

As a leader in the vast and ever-evolving world of AI and operational technology, Findability Sciences continues to push the boundaries of what's possible. With its Business Process Co-Pilots, the company reaffirms its position as a leader in driving businesses towards smarter, faster, and more reliable adoption of AI.

About Findability Sciences:

Findability Sciences stands at the forefront of AI Product and Solution providers, with a keen focus on facilitating traditional enterprises in harnessing the power of data and cutting-edge AI technologies.
