

# Episode Six selected to join Mastercard Engage Programme for instalments in Europe

*Programme provides partners with fast and easy access to qualified technology partners*

LONDON, UNITED KINGDOM, February 15, 2024 /EINPresswire.com/ -- Building upon its initial enrolment in the Mastercard Engage Programme, Episode Six (E6), a leading global provider of enterprise-grade payment processing and ledger infrastructure, announced it has been selected to join the Mastercard Engage Programme for its instalments solution in Europe.

Despite the challenging economic environment and new regulatory requirements adding pressure to the instalments market, the demand for buy-now-pay-later (BNPL) solutions continues to grow. And amid growing financial pressures, more customers welcome the ability to break payments into smaller and more manageable instalments.

Our inclusion in the Mastercard Engage platform reinforces our commitment to revolutionize the payment landscape and address the evolving needs of the market."

*John Mitchell, CEO & Co-Founder at Episode Six.*

Against this backdrop, E6 saw an opportunity to leverage its flexible, cloud native TRITIUM® platform to enable incumbent issuers to launch new and modern instalment solutions such as BNPL. These new solutions complement issuers' current offerings without disrupting services on their existing infrastructures.

In turn, traditional issuers can offer these new instalment solutions to banks, enabling them to provide tailored instalment offerings to their customers, thus creating new revenue streams. E6 is one of the few in the market that offers a ready-to-launch payment instalment solution that enables BNPL, instalments cards and loans—and that's just the surface.

Mastercard Engage makes it simple for partners to build, launch and grow payment solutions for Mastercard's global network of customers and accelerate time to market for product innovation. Mastercard Engage includes a range of partners that each contribute different components and integration capabilities to enable seamless payment experiences. Participants in the Engage program also receive opportunities to boost their growth, gain access to exclusive resources and perks as well as enhance their brand's visibility.

"We're delighted that Mastercard has decided to include Episode Six's Buy Now, Pay Later technology on its Mastercard Engage platform," said John Mitchell, CEO & Co-Founder of Episode Six. "We have strengthened our instalments offering to make it fit-for-purpose for financial institutions, providing a seamless, digital-first instalment lending experience that addresses the needs of their customers. Our inclusion in the Mastercard Engage platform reinforces our commitment to revolutionize the payment landscape and address the evolving needs of the market."
