

Varist's Malware Detection Engine V6.0 achieves Korea Internet & Security Agency certification

KISA certification for Varist's Malware Detection Engine underlines commitment to Korean market and strengthens partnership with regional distributor Jirandata.

REYKJAVIK, ICELAND, February 15, 2024 /EINPresswire.com/ -- Varist is delighted to announce the recent certification of its Malware Detection Engine V6.0 by the Korean Internet & Security Agency (KISA) Security Product Performance Evaluation Council. KISA Certification ensures that cyber security vendors competing in Korea can implement Varist's Malware Detection Engine with confidence.

The certification was achieved with the important assistance from Varist's local partner in Korea, Jirandata. Having worked together successfully for many years, Jirandata provides Varist with expert knowledge and Go-To-Market assistance in not only Korea, but also in wider Asia.

KISA Security Product Performance Evaluation Council ensures that cyber security products meet minimum standards to ensuring that Korean companies and government organisations implementing security can have confidence that the solution meets KISA standards.

"KISA certification is an important step for Varist. We have many valued customers in Korea and we fully expect the Korean market will be strategic for Varist's growth in 2024 and beyond. We would like to thank our esteemed local partner, Jirandata, for their invaluable assistance in helping us achieve this milestone."

- Hallgrímur Th. Björnsson - CEO, Varist

"Varist Anti-Malware SDK V6.0' has received certification from the Korea Internet & Security Agency (KISA). We plan to actively support Varist to provide stable services and business

expansion in Korea.”

- Byoung-Wan Yoo - CEO, Jirandata Co., Ltd
