The growing demand for facial makeup products along with lakes and toners across working professionals is likely to propel the revenue growth of color cosmetic products. Consumers are purchasing inorganic based cosmetic products as the cosmetic product manufactured with inorganic dyes offers more vibrant and consistent coloring effect over organic dyes. These products are also affordable, readily available and easy to use. Currently, majority of cosmetic manufacturing are using inorganic dyes in certain products range including facial makeup, and lipstick. However, these inorganic dyes based cosmetic products prone to shorter life as compared with organic one.

Changing fashion trends, extension of current product line from leading companies, and effective collaboration between manufacturing are driving the growth of cosmetic dyes market. Companies are collaborating with each through agreements and joint ventures to introduce

novel products to cater changing market demand. The effective channel strategies and expansion of digital media has significantly increased the overall demand for cosmetic products. This has resulted into increased spending on latest cosmetic products such as nail polishes, eyeliners, lipsticks, among others. The inorganic dyes segment was valued at \$247.8 Mn in 2019 and is expected to reach \$323.4 Mn by 2026 growing at a CAGR of 3.9% during the forecast period.

The current supplier base from Asia-Pacific region is targeting product capacity expansion to cater increasing market demand for color cosmetic products. European countries would remain predominant in terms of cosmetic dyes market share owing to strong penetration of premium cosmetic products. Moreover, strong penetration of e-commerce distribution network and availability of international brands in the local market have provided revenue growth for overall cosmetic products. Thereby, increasing the overall demand for raw materials used in cosmetic manufacturing including cosmetic dyes. The Facial Makeup application segment was valued at \$149.7 Mn in 2019 and is expected to reach \$198.4 Mn by 2026 growing at a CAGR of 4.1% during the forecast period.
