Regional Analysis

North America accounted for the largest market in the Neonicotinoid Pesticide market. North America accounted for 38% of the worldwide market value. In North America, neonicotinoid

pesticides are widely used to protect crops from a variety of pests. Since there is a lot of agriculture in the United States and Canada, this area has been a big market for these pesticides. Neonicotinoids are frequently used on a variety of crops, including canola, corn, and soybeans. Neonicotinoids have been the subject of debate and scrutiny in recent years, mostly because of worries about how they may affect pollinators, particularly bees. Concerns have been expressed by academics and environmentalists regarding neonicotinoids' possible detrimental effects on bee populations, which are essential to pollination and biodiversity preservation.
