

Performance Elastomer Market Size, Scope and Growth Overview to 2021-2031

Performance elastomer market is projected to reach \$31.6 billion by 2031, growing at a CAGR of 7.2% from 2022 to 2031

WILMINGTON, DELAWARE , UNITED STATES, February 22, 2024

/EINPresswire.com/ -- The global [performance elastomer industry](#) generated \$15.8 billion in 2021, and is anticipated to generate \$31.6 billion by 2031, witnessing a CAGR of 7.2% from 2022 to 2031.

Allied Market Research published a report, titled, "Performance Elastomer Market by Type (Nitrile based Elastomers, Silicone Elastomers, Fluoroelastomers, Others), by End Use Industry (Automotive and Transportation, Healthcare, Industrial Machinery, Building and Construction, Electrical and Electronics, Others): Global Opportunity Analysis and Industry Forecast, 2021-2031".

Leading Market Players: -

- DuPont de Nemours, Inc.
- Wacker Chemie AG
- Exxon Mobil Corporation
- Mitsui Chemical Inc
- BASF SE
- Zeon Chemicals L.P.
- Solvay S.A.
- Dow
- 3M Company
- Daikin Industries Ltd.

Prime determinants of growth

The superior qualities and excellent properties of performance elastomers over ordinary elastomers, application in the transportation and automotive industries, and the rising disposable income and purchasing power of consumers drive the growth of the global performance elastomer market. However, the fact that performance elastomer is incapable of biodegradation and causes harm to the environment restrict the market growth. On the other hand, rising awareness regarding the use of performance elastomer and tight government rules and regulations related to the use of rubber present new opportunities in the coming years.

Key findings of the study

- On the basis of type, the fluoroelastomers segment is expected to grow at a CAGR of 7.5%, in terms of revenue, during the forecast period.
- Depending on the end-use industry, the automotive and transportation segment is expected to grow at a CAGR of 7.7%, in terms of revenue, during the forecast period.
- Region-wise, Asia-Pacific garnered highest share in 2021 in terms of revenue. The silicone elastomers segment to maintain its leadership status throughout the forecast period

Based on type, the silicone elastomers segment held the highest market share in 2021, accounting for more than one-third of the global performance elastomer market, and is estimated to maintain its leadership status throughout the forecast period. This is owing to its usage for electrical insulation as wire and cable coverings, sheet, tape, extruded sleeving and moldings. However, the fluoroelastomers segment is projected to manifest the highest CAGR of 7.5% from 2022 to 2031. In the automotive industry, elastomers are replaced with fluoroelastomers due to their low resistance. In the aircraft industry, fluoroelastomers are utilized extensively for insulation and a variety of other purposes.

The Automotive and Transportation segment to maintain its leadership status throughout the forecast period

Based on category, the automotive and transportation segment held the highest market share in 2021, accounting for more than one-fourth of the global performance elastomer market, and is estimated to maintain its leadership status throughout the forecast period. In addition, the same segment is projected to manifest the highest CAGR of 7.7% from 2022 to 2031. There is an increasing demand for performance elastomers for the production of automotive interior components, such as airbags, as a result of recent constraints imposed on automotive manufacturers that made airbags necessary for all cars globally.

Asia-Pacific to maintain its dominance by 2031

Based on region, Asia-Pacific held the highest market share in terms of revenue in 2021, accounting for nearly half of the global performance elastomer industry, and is likely to dominate the market during the forecast period. In addition, the same region is expected to

witness the fastest CAGR of 7.6% from 2022 to 2031. Increasing automobile manufacturing, particularly electric vehicles in India, China, Thailand, and Indonesia is predicted to drive performance elastomers market growth in Asia-Pacific. In addition, increased urbanization and rapid industrialization in these countries to support their expanding populations are influencing the building and manufacturing industries. This contributes to the development of the global performance elastomers market.

About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
