Jolly Good Revolutionizes Healthcare with Immersive Service for Apple Vision Pro, Premiering at SXSW 2024

A Milestone Entry into Spatial Computing Healthcare

BROOKLINE, Mass. — Jolly Good US Inc. proudly presents "JOLLYGOOD+ for Vision Pro," a groundbreaking immersive medical service harnessing the power of spatial computing through Apple Vision Pro technology. This innovative leap forward enables us to transcend the limitations of conventional VR, ushering in a new era of immersive medical training and healthcare services. Furthermore, we're thrilled to announce the imminent release of our dedicated app on the App Store in early March 2024. The anticipation builds as we prepare to unveil this groundbreaking service for the very first time at SXSW Creative Industries Expo 2024 in Austin, Texas.

Drawing from our extensive experience in delivering cutting-edge medical education and healthcare services leveraging VR x AI technology to nations worldwide, we're proud to unveil "JOLLYGOOD+ for Vision Pro." Built upon the foundational concept of spatial computing, this service represents a significant advancement in healthcare delivery, seamlessly bridging the virtual and real worlds to provide a stress-free, intelligent, and efficient healthcare experience. With a proven track record of implementation and development at esteemed medical institutions, medical device manufacturers, and pharmaceutical companies, Jolly Good stands as a trusted partner in revolutionizing healthcare. Dive deeper into the immersive world of "JOLLYGOOD+ for Vision Pro" by watching our promotional movie.
