Stere Powers AutoPylot to Introduce Groundbreaking Embedded Drone Insurance
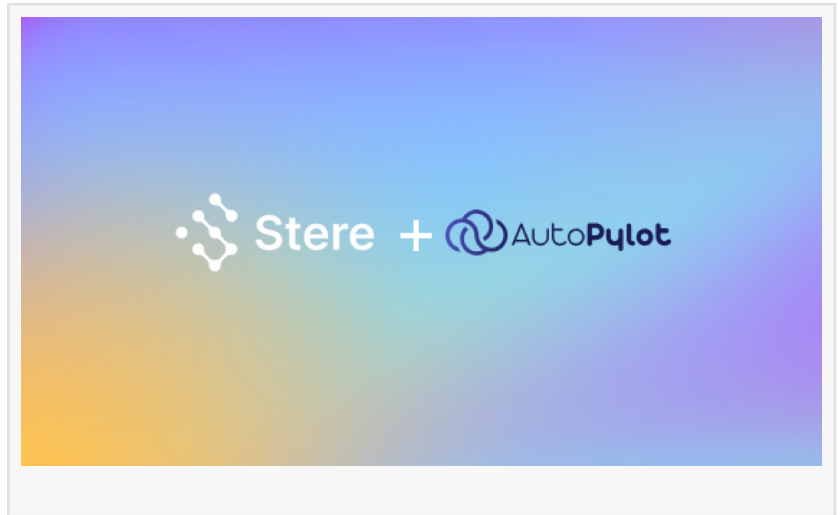

NEW YORK, NY, UNITED STATES, February 28, 2024 /EINPresswire.com/ -- Stere, a leading innovator in insurance technology, has enabled AutoPylot, an FAA-approved B4UFLY and LAANC service provider, to launch a pioneering embedded drone insurance feature within its all-in-one flight planning platform. This tech-driven partnership, with insurance underwritten by Allianz Commercial, showcases Stere's vision, providing a unique infrastructure that integrates comprehensive insurance directly into any workflow.

This collaboration represents a significant leap forward in drone safety and efficiency, marrying Stere's cutting-edge tech with AutoPylot's regulatory and flight planning capabilities. Through Stere's technology, drone operators now have streamlined access to essential insurance coverage, enhancing the sustainability and accessibility of drone operations across the industry.

"Stere's mission is to revolutionize the way insurance is integrated into business operations, making it seamless and accessible," said Dogan Kaleli, CEO at Stere. "Our technology enables AutoPylot to offer a unique, embedded insurance solution, highlighting our role as a tech vendor transforming insurance procurement and management for drone operators."

The introduction of embedded insurance through AutoPylot's platform simplifies the way drone operators access and manage insurance, covering a wide range of liabilities and providing comprehensive protection for drones and related equipment. This initiative not only enhances operational efficiency but also ensures that drone pilots are fully protected and compliant with industry regulations.

This partnership between Stere and AutoPylot, with insurance primarily underwritten by Allianz Commercial, underscores the potential of technology to redefine industry standards and improve the safety and efficiency of drone operations.
