“

Growing global population fuels increased demand for innovative agribusiness solutions, emphasizing sustainability and efficiency.”

*Exactitude Consultancy*

Agribusiness Market. Additionally, it provides a futuristic perspective on various factors that are likely to fuel the growth of the Worldwide Agribusiness Market in the coming years.

The Agribusiness market is predictable to grow from USD 3.31 Trillion in 2023 to USD 4.16 Trillion by 2030; it is expected to grow at a CAGR of 3.32% from 2024 to 2030.

Increasing demand for food due to population growth is

notably driving the market growth. The global market is driven in large part by the fast population expansion occurring worldwide. Population growth fuels the need for food, which in turn fuels the demand for food goods. According to the United Nations Department of Economics and Social Affairs, the population in 2022 was 8 billion, which has quadrupled from

the population statistics observed in 1950, which was just 2.53 billion. The population is expected to increase to 8.5 billion by 2030.

Agribusiness Market by Processing & Distribution

Food Processing

Beverage Production

Distribution & Logistics

Agribusiness Market Regional Analysis/Insights

North America accounted for the largest market in the agribusiness market. North America accounted for 40 % market share of the global market value. North America has consistently held a dominant position in the global agribusiness market, reflecting the region's robust and diverse agricultural sector, technological advancements, and sophisticated supply chain infrastructure. The United States, Canada, and Mexico collectively contribute to the region's prominence in agribusiness. The vast and varied geography of North America supports a wide range of agricultural activities, including crop cultivation, livestock farming, and agro-processing.

In the United States, large-scale commercial farming operations leverage advanced technologies such as precision agriculture, genetically modified crops, and automated machinery. This technological sophistication enhances productivity, efficiency, and the overall competitiveness of the agricultural sector. The U.S. is a major producer of key crops such as corn, soybeans, and wheat, and it has a well-established livestock industry.

Canada, with its extensive arable land and favorable climate conditions in certain regions, is a major contributor to the agribusiness market. The country is known for its production of canola, barley, and various fruits, as well as its significant livestock sector, including cattle and poultry. Mexico plays a crucial role in North America's agribusiness landscape, combining traditional agricultural practices with modern approaches. The country is a leading exporter of fruits and vegetables, such as tomatoes, avocados, and berries, to North American and international markets.
