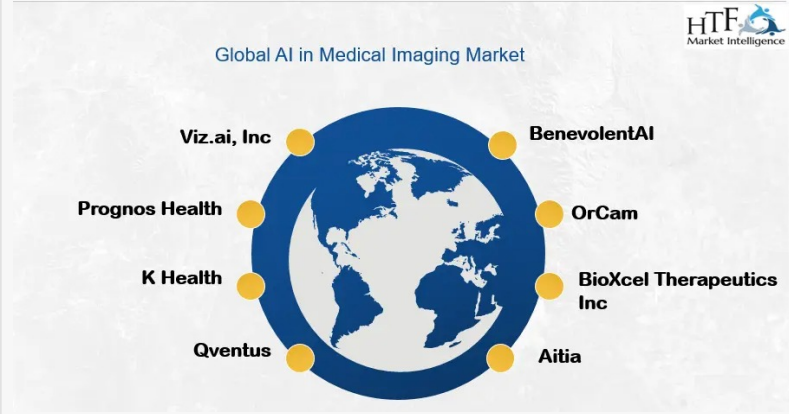
AI in Medical Imaging Market to Witness Impressive Growth with Owkin, Qventus, Enlitic

A New business Strategy report released by HTF MI with AI in Medical Imaging Market Study Forecast till 2030.



AI in Medical Imaging

PUNE, MAHARASHTRA, INDIA, February 29, 2024 /EINPresswire.com/ -- HTF Market Intelligence recently released a survey document on AI in Medical Imaging market and provides information and useful stats on market structure and size.
The report is intended to provide market intelligence and strategic insights to help decision-makers take sound investment decisions and identify potential gaps and growth opportunities. Additionally, the report also identifies and analyses changing dynamics, and emerging trends along with essential drivers, challenges, opportunities, and restraints in the AI in Medical Imaging market.

> HTF MI integrates History, Trends, and Forecasts to identify the highest value opportunities, cope with the most critical business challenges and transform the businesses."
>
> *Criag Francis*

Some of the companies listed in the study from the complete survey list are BenevolentAI (United Kingdom), OrCam (Israel)., BioXcel Therapeutics Inc (United States), Aitia (United States), Qventus (United States), K Health (United States), Prognos Health (United States), Viz.ai, Inc (United States), mPulse Mobile (United States), Suki AI, Inc (United States), ZealthLife technologies Pte. Ltd (Singapore), Owkin Inc. (United States), Siemens Healthineers AG (Germany), EchoNous, Inc (United States), Enlitic, Inc (United States).

According to HTF Market Intelligence, the global AI in Medical Imaging market is valued at USD million in 2023 and estimated to reach a revenue of USD million by 2030, with a CAGR of % from 2023 to 2030.

Definition:

AI in Medical Imaging refers to the integration and utilization of artificial intelligence (AI) technologies in the field of medical imaging. This application involves the use of advanced algorithms and machine learning techniques to analyze and interpret medical images, such as X-rays, CT scans, MRIs, and ultrasound, with the aim of assisting healthcare professionals in diagnosis, treatment planning, and patient care.

Market Trends:

AI solutions were being integrated into radiology workflows to assist radiologists in interpreting and analyzing medical images more efficiently.
The emphasis was on creating tools that seamlessly fit into existing processes and enhance the capabilities of healthcare professionals.

Market Drivers:

AI algorithms have demonstrated the ability to analyze medical images with high precision, leading to improved diagnostic accuracy.
This can be especially valuable in detecting subtle abnormalities or patterns that may be challenging for human observers to identify.

Market Opportunities:

AI can contribute to the early detection of diseases and abnormalities in medical images, enabling timely intervention and preventive measures. Early detection often leads to more effective treatment options and improved prognosis.

Latest Market Insights:

In August 2021, VUNO Inc., a South Korean AI company, has announced a partnership with Samsung Electronics to incorporate the AI-powered mobile digital X-ray system VUNO Med-Chest X-ray inside the GM85. This collaboration is expected to bring VUNO closer to creating AI applications.

Key Benefits of the Report:

This study presents the analytical depiction of the AI in Medical Imaging market industry along

with the current trends and market estimation to determine the imminent investment pockets.The
AI in Medical Imaging market report represents information related to key drivers, restraints, and opportunities along with a detailed analysis of the market.

The current market is quantitatively analyzed to highlight the market trend and growth scenario.
The report provides a detailed market analysis about how the competition will take shape in the coming years.
This report helps users in comprehending the key product segments of AI in Medical Imaging Industry and its future.

Key Players in This Report Include: BenevolentAI (United Kingdom), OrCam (Israel)., BioXcel Therapeutics Inc (United States), Aitia (United States), Qventus (United States), K Health (United States), Prognos Health (United States), Viz.ai, Inc (United States), mPulse Mobile (United States), Suki AI, Inc (United States), ZealthLife technologies Pte. Ltd (Singapore), Owkin Inc. (United States), Siemens Healthineers AG (Germany), EchoNous, Inc (United States), Enlitic, Inc (United States)

The Global AI in Medical Imaging Market segments and Market Data Break Down are illuminated below:
AI in Medical Imaging Market is Segmented by Global AI in Medical Imaging Market Breakdown
by Application (Oncology, Neurology, Cardiology, Musculoskeletal, Breast Health, Others)
by Technology (Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision Technologies)
by End User (Hospitals, Diagnostic Imaging Centers, Research Institutions, Others) and
by Geography (North America, South America, Europe, Asia Pacific, MEA)

Global AI in Medical Imaging market report highlights information regarding the current and future industry trends, growth patterns, as well as it offers business strategies to helps the stakeholders in making sound decisions that may help to ensure the profit trajectory over the forecast years.

Geographically, the detailed analysis of consumption, revenue, market share, and growth rate of the following regions:

- The Middle East and Africa (South Africa, Saudi Arabia, UAE, Israel, Egypt, etc.)
- North America (United States, Mexico & Canada)
- South America (Brazil, Venezuela, Argentina, Ecuador, Peru, Colombia, etc.)

• Europe (Turkey, Spain, Turkey, Netherlands Denmark, Belgium, Switzerland, Germany, Russia UK, Italy, France, etc.)
• Asia-Pacific (Taiwan, Hong Kong, Singapore, Vietnam, China, Malaysia, Japan, Philippines, Korea, Thailand, India, Indonesia, and Australia).

Objectives of the Report

• -To carefully analyze and forecast the size of the AI in Medical Imaging market by value and volume.
• -To estimate the market shares of major segments of the AI in Medical Imaging
• -To showcase the development of the AI in Medical Imaging market in different parts of the world.
• -To analyze and study micro-markets in terms of their contributions to the AI in Medical Imaging market, their prospects, and individual growth trends.
• -To offer precise and useful details about factors affecting the growth of the AI in Medical Imaging
• -To provide a meticulous assessment of crucial business strategies used by leading companies operating in the AI in Medical Imaging market, which include research and development, collaborations, agreements, partnerships, acquisitions, mergers, new developments, and product launches.

Major highlights from Table of Contents:

AI in Medical Imaging Market Study Coverage:

• It includes major manufacturers, emerging player's growth story, and major business segments of AI in Medical Imaging market, years considered, and research objectives. Additionally, segmentation on the basis of the type of product, application, and technology.

• AI in Medical Imaging Market Executive Summary:

It gives a summary of overall studies, growth rate, available market, competitive landscape, market drivers, trends, and issues, and macroscopic indicators.
• AI in Medical Imaging Market Production by Region AI in Medical Imaging Market Profile of Manufacturers-players are studied on the basis of SWOT, their products, production, value, financials, and other vital factors.

Key Points Covered in AI in Medical Imaging Market Report:

- AI in Medical Imaging Overview, Definition and Classification Market drivers and barriers
- AI in Medical Imaging Market Competition by Manufacturers
- Impact Analysis of COVID-19 on AI in Medical Imaging Market
- AI in Medical Imaging Capacity, Production, Revenue (Value) by Region (2023-2030)
- AI in Medical Imaging Supply (Production), Consumption, Export, Import by Region (2023-2030)
- AI in Medical Imaging Production, Revenue (Value), Price Trend by Type {Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision Technologies}
- AI in Medical Imaging Manufacturers Profiles/Analysis AI in Medical Imaging Manufacturing Cost Analysis, Industrial/Supply Chain Analysis, Sourcing Strategy and Downstream Buyers, Marketing
- Strategy by Key Manufacturers/Players, Connected Distributors/Traders Standardization, Regulatory and collaborative initiatives, Industry road map and value chain Market Effect Factors Analysis.

Key questions answered

- How feasible is AI in Medical Imaging market for long-term investment?
- What are influencing factors driving the demand for AI in Medical Imaging near future?
- What is the impact analysis of various factors in the Global AI in Medical Imaging market growth?
- What are the recent trends in the regional market and how successful they are?

Thanks for reading this article; you can also get individual chapter wise section or region wise report version like North America, Middle East, Africa, Europe or LATAM, Southeast Asia.

About Author:
HTF Market Intelligence Consulting is uniquely positioned to empower and inspire with research and consulting services to enable businesses with growth strategies, by offering services with extraordinary depth and breadth of thought leadership, research, tools, events, and experience that assist in decision-making.
