"Demand for Ceramic Glazes Due to Urbanization to Promote Industry Progress"

Due to urbanization, there is a sharp increase in demand

for ceramic tiles. The number of people moving to metropolitan regions is expected to increase over the next several years, and more than half of the world's population already resides there. Ceramic glazes, which are used to create ceramic tiles for floors and walls, mostly consist of calcium oxalate as a component. To ensure a consistent supply of calcium oxalate for the end-

user market, ceramic tile producers are forging partnerships with distributors and wholesalers of the substance.
