Based on geography, the global market for Anatomic Pathology and Disruptions has been segmented as follows:

North America is expected to hold the largest share of the global anatomic pathology market. Due to the presence of big players and government measures supporting pathological training programmes. Due to advantageous reimbursement rules in the United States, the use of tissue-diagnostic related procedures in disease screening is increasing, facilitating regional market expansion. In addition, product approvals and commercialization in the region have aided market expansion. Hologic Inc., for example, gained premarket clearance (PMA) from the US FDA for its ThinPrep Genesis Processor in May 2021. With better workflow, this device combines sample aliquoting with cytology processing. Revenue generation is likely to increase as the number of regulatory approvals rises.
