Based on geography, the global market for Biomarkers and Disruptions has been segmented as follows:

Due to the widespread use of biomarkers in personalized medicine in North America, the area

dominates the global market for biomarkers. The market in North America is expected to grow the fastest, followed by Europe, due to the use of biomarkers in personalized medicine and investments made by several major market players in the creation of the biomarkers and their particular applications.

During the projection period, Asia Pacific is expected to grow more rapidly than other regions. The demand for disease diagnosis, particularly using biomarker-based tests, is rising as cancer and cardiovascular disease are becoming more common. Consequently, it is increasing the region's revenue. Key market participants are investing in the research to create novel biomarkers as a result of the use of biomarkers in the medication discovery and development process. These elements should increase demand for biomarkers and promote market expansion.
