

Global Shoulder Arthroplasty Market Expected to Reach Record Highs by 2024 | CAGR of 7.6 %

Shoulder arthroplasty is gaining traction over the years, as it has become the choice of treatment for the people suffering from arthritis.

PORTLAND, OREGON, UNITED STATES, March 2, 2024 /EINPresswire.com/ -- Shoulder replacement or shoulder arthroplasty procedures are performed to replace the ball and sometimes the socket using a prosthesis made up of polythene and metal components. Several types of shoulder arthroplasties can be performed such as partial shoulder arthroplasty, total shoulder arthroplasty, and revision shoulder arthroplasty, depending on the severity of the shoulder joint damage.

The rise in arthritis and increasing geriatric population is driving the growth of the global shoulder replacement surgery market. Also, increasing focus of manufacturers on the development of advanced shoulder fracture repair devices supports the growth of the market. However, the increased risk of postoperative injuries associated with shoulder replacement surgeries is hampering the market growth. Conversely, increased investment by manufacturers to develop shoulder arthroplasty devices in emerging economies and increased initiatives to increase awareness of available treatments for shoulder injuries are expected to offer profitable opportunities for market expansion.
