

# Pure Life Powered by Nelo, A Revolutionary Solution to Ensure Global Access to Safe Drinking Water

*Nelo Labs a healthtech division of Nelo Group, has introduced Pure Life powered by Nelo, a innovation solution designed to ensure access, to drinking water.*

NEW YORK, NY, UNITED STATES, March 12, 2024 /EINPresswire.com/ -- In a world where clean water accessibility remains a challenge, In line with the United Nations [Sustainable Development Goals](#), which focus on ensuring the availability and sustainable management of water and sanitation for all, Nelo Labs is at the forefront of innovation. In its healthtech division, they are developing a revolutionary technological compound called Pure Life powered by Nelo that promises to make water contaminated with any harmful agent potable for human consumption.

Pure Life powered by Nelo

“

For the first time, we have at hand an innovative and accessible technology that aims to combat the water crisis by transforming contaminated water into drinking water.”

Nelo

The Pure Life powered by Nelo decontamination process is fast and efficient, eliminating up to 99.9% of bacteria and settling contaminants to the bottom of the container. With results that speak for themselves, this technological compound delivers 100% clean drinking water in as little as 5 to 8 minutes.

[Nelo Group](#), as one of the most prominent technological innovation holdings in Latin America, with more than 22 active projects in more than 14 industries worldwide. One of its most ambitious projects is Nelo Space, whose

objective is the future colonization of Jupiter's moon, Ganymede. Aware of the challenges humanity faces in achieving this feat, such as access to the vital resource of water, Nelo Labs is

committed to addressing this need in an innovative and transformative way.

The first steps for the creation of a solution to purify contaminated water on other celestial bodies began in early 2024, when they began to raise the real challenges that may present humanity in the unknown conditions in other celestial bodies, for some years the international scientific community has been discussing the existence of water on other planets and moons of the solar system, having a solution to purify and disinfect that water became a major goal in the startup. Once this technology was developed, Nelo Labs embarked on a social impact project to apply it on Earth, with the goal of reaching vulnerable areas that lack access to safe drinking water.

According to alarming data from [UNICEF](#), currently one in three people in the world do not have access to safe drinking water. This lack of reliable access to safe water affects communities and populations around the world, underscoring the urgency of finding an effective and rapid solution. Jack Daniels Chavarria, known as Nelo, is a Colombian entrepreneur and CEO/Founder of Nelo Group. He is committed to providing immediate and tangible solutions to address this pressing challenge.

The solution presented by Nelo Labs lies in the unique combination of technological innovation, proven efficiency, scalability and social commitment. Pure Life powered by Nelo not only addresses a critical global need, but also has a significant impact on the health and well-being of millions of people in underserved communities.
