Parboiled and White Rice Market

Parboiled and white rice are both rice varieties processed using hydrothermal methods. Parboiled rice is partially boiled in lukewarm or cold water prior to husking and milling, whereas white rice is milled after the removal of husk, bran, and germ. They come in long, medium, and short lengths and serve as rich sources of fiber, calcium, potassium, and vitamin B6. These rice types are extensively utilized in various applications worldwide, including the production of dry powders, frozen foods, and instant soup mixes. They also play essential roles in the preparation of baby foods, ready-to-eat (RTE) breakfast cereals, extruded snacks, biscuits, noodles, fermented beverages, and oils.
