

Structural Heart Devices Market Surges as Aging Population Spurs Cardiovascular Health Concerns

A structural heart disease is a non-coronary defect of the heart, thus not affecting the blood vessels in the heart.

PORTLAND, OREGON, UNITED STATES, March 4, 2024 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled,

["Structural Heart Devices Market by Type, Age Group, and Indication: Global Opportunity Analysis and Industry Forecast.](#)

The structural heart repair devices segment held nearly half of the total market share, and is expected to dominate during the forecast period. A structural heart disease is a non-coronary defect of the heart, thus not affecting the blood vessels in the heart. Most of the structural heart conditions are present since birth (congenital), but these can also be acquired later in life, owing to wear & tear from infection. Advancements in the medical field have replaced the open heart surgical procedures with minimally invasive procedures, such as transcatheter aortic valve replacement (TAVR) and transcatheter mitral valve repair (TMVR).

Blood clots should remain in their normal state during the examination period, due to their important property of low anticoagulant requirements, which reduces bleeding and thus reduces the use of anticoagulants. from the patient. The occluders segment accounted for two-fifths of the overall structural heart repair devices market, owing to its benefits in the treatment of congenital heart diseases and high adoption rate. In addition, annuloplasty ring is projected to register the highest CAGR of 13.3% during the forecast period.

Major market players covered in the report, such as -

- Edwards Lifesciences Corporation,

- Cryolife, Inc.,
- Jenavalve Technology, Inc.,
- St. Jude Medical, Inc.,
- Medical Technology Est.,
- Livanova Plc,
- Boston Scientific Corporation,
- Micro Interventional Devices, Inc.,
- Braile Biomedica,
- Medtronic Plc

Key Benefits for Stakeholders -

- The report provides quantitative analysis of market segments, current trends, strategies and potential of structural heart devices market research to identify potential structural heart devices market opportunities in genetics.
- In-depth analysis of this sector helps identify current market opportunities.
- Market analysis and information related to key drivers, restraints and opportunities are provided. • Porter's Five Forces Analysis identifies the capabilities of buyers and suppliers to enable stakeholders to make profitable business decisions and strengthen the network of buyers.
- The largest countries in each region are listed according to their contribution to the global market.
- Focusing on market players makes benchmarking easier and provides a clear understanding of the current market situation.
- The report includes regional and global structural heart devices market analysis, key players, market segments, application areas and Market growth strategies.

Worldwide, aortic stenosis is the most common cause of death. According to the WHO, it is expected that the number of people over the age of 60 will increase from 12% of the total population in 2015 to approximately 22% by 2050. This predicts an increase in the geriatric population, with an increased risk of structural heart defects such as aortic stenosis or mitral valve regurgitation, should provide opportunities for medical device companies specializing in the treatment of heart defects.

TABLE OF CONTENT -

CHAPTER 1 - INTRODUCTION:

- 1.1. Report description
- 1.2. Key market segments
- 1.3. List of key players profiled in the report

- 1.4. Research methodology
- 1.4.1. Secondary research
- 1.4.2. Primary research
- 1.4.3. Analyst tools & models

CHAPTER 2 - EXECUTIVE SUMMARY:

- 2.1. Key findings of the study
- 2.2. CXO Perspective

CHAPTER 3 - MARKET OVERVIEW:

- 3.1. Market Definition and Scope
- 3.2. Key Findings
 - 3.2.1. Top investment pockets
 - 3.2.2. Top winning strategies
- 3.3. Market Share Analysis/Top Player Positioning
- 3.4. Porter's Five Forces Analysis
- 3.5. Market Dynamics
 - 3.5.1. Drivers
 - 3.5.2. Restraints
 - 3.5.3. Opportunities...
- 3.6. COVID-19 Impact Analysis on the market

Aortic stenosis is caused when the aortic heart valve becomes calcified, leading to complete closure and narrowing of the heart valve. Over time, this disease results in disruption of blood flow from the heart, causing heart weakening, and thus can be treated by transcatheter aortic valve replacement (TAVR).

The structural heart devices market is expected to witness a significant growth in the coming years. This market has gained interest of the healthcare and medical sectors owing to increased prevalence of hypertension throughout the globe. Furthermore, the global structural heart devices market is segmented on the basis of product type, end user, and region. Leading market players have been introducing various strategies to help enterprises move their on-premise models to on-demand models.

Frequently Asked Questions?

1. What are structural heart devices, and how do they differ from traditional cardiac devices?
2. What conditions do structural heart devices treat?
3. What are the main types of structural heart devices available in the market?
4. How are structural heart devices implanted or deployed?

5. What are the potential risks and complications associated with structural heart device procedures?
6. How do advancements in structural heart devices impact patient outcomes?
7. What factors are driving the growth of the structural heart devices market?
8. How does the aging population contribute to the demand for structural heart devices?
9. What role do minimally invasive procedures play in the adoption of structural heart devices?
10. How are regulatory bodies ensuring the safety and efficacy of structural heart devices?

About Us -

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various research data tables and confirms utmost accuracy in our market forecasting. Each and every us companies and this helps us in digging out market data that helps us generate accurate y data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
