Parking and traffic congestion are highly interrelated, as searching for a parking space leads to delays, fuel combustion, and increased congestion. The growing parking issue can be resolved with the help of parking management solutions and services that can aid drivers in not only in

finding a parking space but also in other functions, such as getting directions to the parking space, making cashless payments, and reserving parking spaces in advance. The growing demand for various parking management solutions and services will further help in reducing time and fuel consumption and enable seamless traffic flow.

Collaboration is key to enhancing mobility in cities with heavy traffic. The entire city management ecosystem, including city officials, vehicle manufacturers, traffic signal system providers, parking facilities, parking management solution providers, traffic information providers, shared mobility providers, startups, and public authorities, are working together to experiment and transform cities worldwide to make them more intelligent and efficient. Parking management solution providers are crucial in reducing traffic congestion by providing well-organized on-street and off-street parking facilities.

Residential

The North America region dominated the parking management market by accounting for over 35% of the market share. Smart parking solutions are expanding to relieve traffic congestion as the number of vehicles rises in nations like Canada and the U.S. Also, customers are finding it convenient to utilize cellphones and the availability of mobile apps for parking spaces, which is why they are quickly adjusting to contemporary parking demands. The need for parking management is growing throughout the region as a result of the rising commercialization and

the desire to provide personalized user experiences.

It is expected that the Asia Pacific region would have significant growth. Growth in this area is being fueled by the government's growing interest in creating smart cities and the requirement for a systematic, efficient flow of traffic.
