The online gaming trend increases exponentially as new technologies, such as 4K and Ultra HD, are released. These new technologies improve the gaming experience but can damage the pre-

gaming experience, as they will make the gamers wait for hours to complete the download. This may lead to bad feedback from the gamers on public platforms that can bring loss to the providers. CDN solves this problem by leveraging content caching and a global network of servers. CDN allows gaming companies to deliver core downloads and patches to gamers quickly. In addition, download failures and server crashes are also prevented. All these functionalities improve the pre-gaming experience. In addition, CDN prevents any probability of lagging for players as connectivity problems have become a major problem for players in outlying geographic areas. Moreover, CDN provides scalability and thus enables the player to continually use the game even if the game grows by its file size due to high-quality graphics and other capabilities.

O2, July 2020: a Telefonica company, has announced plans to introduce 5G across the nation, beginning with the coverage of 20 cities and towns by the end of October 2019 and 50 by the middle of 2020. When introducing its 5G services, the corporation concentrated on major corporate districts, entertainment and sporting facilities, and transportation hubs.

September 2020: The Swedish content delivery company Varnish Software has announced a content delivery network (CDN) with edge caching capabilities that is 5G-ready. A carrier-grade, virtualized CDN that is 5G ready is called the Varnish Edge Cloud. It is capable of delivering 150Gbps from a single node with response times under a millisecond.

Banking, Financial Service, And Insurance

Aerospace Defense

Healthcare

Public Sector

It Telecom

Retail

E-Commerce

Other

North America accounted for the largest market in the cloud content delivery market. Due to the high adoption of the internet rate, there will probably be an increase in content. Due to the presence of market leaders and early technology adoption across numerous end-user verticals, North America now holds the top regional market position and is anticipated to maintain its dominance during the projected period. The transition in consumer behavior from brick-and-mortar retail to online E-commerce website sales has made it crucial for E-commerce providers to improve their user experience through faster content delivery, hassle-free website interaction, and many other methods. Over the course of the forecast period, this should accelerate market growth.

For instance, the Census Bureau of the Department of Commerce reported that the estimated U.S. retail e-commerce sales for the first quarter of 2019 were USD 137.7 billion, an increase of 3.6% over the fourth quarter of 2018, after being adjusted for seasonal fluctuation but excluding price changes. Furthermore, some of the region's well-known e-commerce companies quickly adopted CDN solutions to boost network traffic and lower latency, which further assisted the regional market in maintaining its dominant share. The usage of these solutions contributes significantly to the distribution of digital material to end users by providing them with essential content.

This report provides market intelligence in the most comprehensive way. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market. The following are the key features of the report:

Market structure: Overview, industry life cycle analysis, supply chain analysis.

Market environment analysis: Growth drivers and constraints, Porter's five forces analysis, SWOT analysis.

Market trend and forecast analysis.

Market segment trend and forecast.

Competitive landscape and dynamics: Market share, Product portfolio, New Product Launches, etc.

Attractive market segments and associated growth opportunities.

Emerging trends.

Strategic growth opportunities for the existing and new players.

Key success factors.
