

Advanced Logic Receives Certification for SOC-2 Type 2

Advanced Logic stands at the forefront of security IT solutions and managed services for over 30 years.

FOREST, VA, USA, March 8, 2024

/EINPresswire.com/ -- [Advanced Logic](#) is pleased to announce that they have recently been certified for an advanced security best practices certification called SOC-2 Type 2. This certification is a significant milestone for the company, highlighting their commitment to security and data protection.

Advanced Logic and their Brush Mountain Data Centers received this Service Organization Control 2 certification due to their rigorous standard for security and data protection practices. Companies that have earned this recognition demonstrate an unwavering dedication to safeguarding their client's data with the utmost integrity and security through their services.

To obtain the SOC-2 Type 2 certification, Advanced Logic underwent an independent, third-party audit that thoroughly examined their processes, controls, and safeguards to ensure they meet or exceed the strict standards set for SOC-2 certification. Some criteria required for the certification include data security, service availability, confidentiality, and integrity. Advanced Logic surpassed these requirements through the hard work of their team and dedication to meeting the highest standards of security to overcome the ever-changing threats.

Michael Barry, founder and CEO of Advanced Logic, states, "Our entire leadership worked closely with each other, with assistance from Engineering and Development to make this happen. I consider this the achievement of a major milestone and demonstrates maturity and continuing excellence from our organization."

For more information about their SOC-2 Type 2 certification or the services offered, visit the Advanced Logic website or call 800-283-2648.
