

Date Detective Launches App for Rating and Reviewing Dates

"It's like Yelp for dating" New dating app empowers users to share experiences and insights, offering transparency in the murky waters of digital romance

UNITED STATES, March 8, 2024

/EINPresswire.com/ -- [Date Detective](#) is now available in the U.S. (and soon, Canada), offering a straightforward solution to one of online dating's biggest challenges: figuring out who you're really talking to. By enabling users to share and access reviews about their dates, the app aims to shed light on the often murky waters of online dating, making it easier and safer for everyone involved.

The digital dating landscape is fraught with uncertainties, with existing platforms like the "Are We Dating The Same Guy" Facebook group providing help, but it's limited. The need for a reliable source of information on potential matches has never been more real, with daters often left to piece together fragments of truth from scattered sources.

Date Detective fills this void, allowing users to share their dating stories and learn from others' experiences. The app has a sophisticated system to combine data across all user reviews and determine which ones are about the same person. With their easy-to-use search feature, users can find all the information about someone regardless of where they live. Date Detective has a simple but effective system of ratings and reviews that brings a new level of transparency to online dating. With its robust tools and thoughtful privacy settings, Date Detective is setting out to be more than just a new dating forum. It's aiming to transform online dating into a more transparent, trustworthy, and user-friendly experience.

Key features of Date Detective

Date Detective is redefining the online dating experience with its user-centric features, helping communities build a safe and open dating environment:

- Rate and review: Users can anonymously rate and review their dating experiences, providing valuable insights for the community.
- Comprehensive search: A powerful search tool allows users to find reviews based on names, contact details, or social media profiles.
- Privacy controls: Adjustable privacy settings ensure users can share their experiences while maintaining their own confidentiality.
- Community insights: Aggregated data offers a broader perspective on individuals' dating histories, promoting informed decision-making.
- Groups: Users can create their own public spaces to better engage with the wider community or create a private group just for friends.

These features collectively contribute to a more informed and respectful online dating culture, where transparency and safety are paramount.

About Date Detective

Date Detective was created by a group of three friends, inspired by their personal experiences and tribulations with online dating. They're on a mission to make online dating safer and more transparent. With its innovative review and rating system, Date Detective empowers users to share their dating experiences, cultivating a community where informed decisions lead to better dating outcomes. Available now in the U.S., and soon in Canada.

For more details and to join a community committed to safer and more transparent dating, please visit www.date-detective.app or download the app from the [Apple App Store](#) or [Google Play Store](#).
