According to HTF Market Intelligence, the Global Peat market to witness a CAGR of 15.75% during forecast period

of 2024-2030. The market is segmented by Global Peat Market Breakdown by Application (Fuel & Energy, Agriculture, Domestic, Medicine) by Type (Coco Peat, Sod Peat, Other Types) by Material

(Hemic, Sepric, Fabric, Other Materials)

Definition:

Peat is categorized as a slow-renewable energy source, and the expresses the extent of peat-based bioproducts offers significant growth potential for this fuel. As a result, demand for natural and organic energy sources is generally increasing across a variety of businesses. Additionally, the use of bio-based fuels and the quickening pace of industrialization around the world both contribute to the growth of this market. Global population growth together with various government investments and policies, particularly in developing nations, have boosted the demand for general infrastructure expansion, which has increased the need for peat. This is specifically used to meet the rising need for electricity generation. Peat is also utilized for a variety of other different purposes, including water filtration systems, freshwater aquariums, and agricultural uses. The market will be boosted during the forecast years by an expansion in the widespread adoption of bio-based fuels as a result of an uptick in environmental deterioration overall from the usage of damaging non-renewable energy sources including fossil fuels and its consciousness.

Major Highlights of the Peat Market report released by HTF MI

Global Peat Market Breakdown by Application (Fuel & Energy, Agriculture, Domestic, Medicine) by Type (Coco Peat, Sod Peat, Other Types) by Material (Hemic, Sepric, Fabric, Other Materials) and by Geography (North America, South America, Europe, Asia Pacific, MEA)
