A window film refers to a film that is used for energy saving, glare reduction, adding decorative

elements or branding to glass, daylighting and daylight redirecting, and safety and security purposes. Window film is a thin material that improves existing windows to assist homeowners and business owners to save energy. It is made of layers of polyester and coated with reflective coatings. Professionally installed window film prevents harmful ultraviolet (UV) rays, which delay the deterioration of interior furnishings, fabrics, and floors.
