

Cable Blowing Equipment Market Forecast: CAGR of 5.7% Reveals Lucrative Growth Prospects

*Cable Blowing Equipment Market
Industry Trends, Raw Material and
Investment Opportunities*

AUSTIN, TEXAS, UNITED STATES, March 11, 2024 /EINPresswire.com/ -- [Cable Blowing Equipment Market](#) Size was valued at USD 102 million in 2022 and is expected to reach USD 158.92 Million by 2030, and grow at a CAGR of 5.7% over the forecast period 2023-2030.

In the dynamic landscape of the telecommunications industry, cable blowing equipment emerges as a crucial component for seamless network deployment. As demand for high-speed internet and enhanced connectivity surges globally, the cable blowing equipment market experiences a parallel growth trajectory. Market research indicates a growing preference for pneumatic cable blowing equipment over traditional installation methods. The ability to navigate complex duct structures and deploy cables with precision positions pneumatic systems as the preferred choice for modern network installations.

The cable blowing equipment market witnesses a steady surge owing to the proliferation of fiber optic networks worldwide. With governments and enterprises investing significantly in broadband infrastructure, the demand for efficient cable blowing solutions amplifies, driving market expansion.

Technological advancements play a pivotal role in shaping the cable blowing equipment market. Innovations such as automated cable blowing systems and precision-engineered machinery enhance installation efficiency, reducing labor costs and project timelines for network

Top Key Players of Cable Blowing Equipment Market:

Adishwar Tele-Networks

Gabe's Construction

Jakob Thaler GmbH

Ningbo Eastern-Grid Power

Plumettaz

Stanlay

Plumett

General Machine Products

FOK Cable Blowing Machines

CBS Products

Bagela

Huaxiang Dongfang

Prayaag Technologies

Anfkom, Hexatronic Group

Jetting AB

Ningbo Marshine Power Technology

Skyfiber Tech

Upcom Telekomunikasyon

Fremco, Condux International

LANCIER CABLE GmbH

TT Technologies Inc

Asian Contec Ltd

Genius Engineers

Growth Drivers:

The primary driver of the worldwide market is the increasing construction of data centers throughout the world. Communications between data centers and inside them require fiber optic lines. Optical interconnects are used to send data between data centers on campuses or in

buildings for connection. Between two data centers, the fiber optic network can span thousands of kilometers and have extremely fast transmission speeds. As a result, these data centers need a large quantity of data capacity in order to transport massive volumes of data over great distances. Due to this, there is a growing need for fiber cables, which can support access networks or serve as a backhaul network for data centers. The need for fiber installation work is growing as a result. As a result, the market is fueling the rise in bandwidth and power requirements in data centers.

Cable Blowing Equipment Market Segmentation:

BY POWER

Hydraulically Powered

Battery Powered

Drill-driven

Pneumatically Powered

Electric-driven

Other

BY CABLE

Normal Duct

Micro-duct

Other

Reasons to Purchase this Report

- Qualitative and quantitative analysis of the market based on segmentation involving both economic as well as non-economic factors
- Provision of market value (USD Billion) data for each segment and sub-segment
- Indicates the region and segment that is expected to witness the fastest growth as well as to dominate the market
- Analysis by geography highlighting the consumption of the product/service in the region as well as indicating the factors that are affecting the market within each region
- Competitive landscape which incorporates the market ranking of the major players, along with new service/product launches, partnerships, business expansions, and acquisitions in the past five years of companies profiled
- Extensive company profiles comprising of company overview, company insights, product benchmarking, and SWOT analysis for the major market players.
