beyond. In this case, think about Stranger Things meets Red Hot Flame-colored Ants with a hint of family drama. Forget about the teen angst and cute little critters you see online. Billy and Sarah have bigger problems to face. These hordes of terror aren't your regular fire ants. They are glowing red, flammable nightmares sent to Battlefield Earth. Determined insects are something we all can relate to.

Billy Bender and the Red Hot Ants: A tale from the "Outer Worlds Collection"

Artica Burr writes, “As the adventure unfolds, Billy, his peculiar pet, and newfound friend, Sarah, all discover the truth, that no one’s life is perfect. Billy and Sarah are not alone in living a single-parent lifestyle, and both have lost touch with their birth fathers. At school, although they had been concealing their aptitudes in science, it becomes their lifeline once a daunting mystery evolves concerning their science teacher and apartment complex. While discovering evidence, they learn to embrace the reality that honesty works best concerning family communications, and how comfortably liberating it feels to be their individual selves. Helpless to physically bring the emergency to a halt themselves, they divulge their baffling discoveries and unite their families in the effort. It becomes a contest of wits, ant colony vs. their families. As danger accelerates, each one of them becomes a trusted, necessary, and valuable player. Once learning that their greatest weapons will be timing and teamwork the families strive forward to affront the yet unnumbered extent and exact whereabouts of their declared enemy.”
