

Omnigence Asset Management: Preparing for stagflation and the “socioeconomic barbell”

CALGARY, ALBERTA, CANADA, March 13, 2024 /EINPresswire.com/ -- Will Canada experience a period of stagflation? Is the Canadian middle class at risk?

In a new report by Omnigence Asset Management, the following economic variables are examined and modelled

to explore these questions: inflation, real GDP growth, real GDP growth per capita, regulatory policy, capital flows, current account, productivity, fiscal account, gross debt, household savings, capital formation, population growth, demographics, dependency ratio, currency, housing supply, housing, investment, and energy costs.

Who is Omnigence Asset Management?

Omnigence team members act as principals of the GPs of a series of alternative funds focused on finding unique sources of return across a board spectrum of strategies. Core members of the team have been investing together since 2007 with a track record of generating returns for both institutional and retail investors. We prefer novel and underinvested segments of the alternative universe in which to deploy capital. We seek to access strategies that might otherwise might not be on the radar of most investors. Smaller can often be beneficial. Less financialized market segments often exhibit higher returns and better capital deployment prospects due to reduced competition and useful correlation benefits and reduced volatility when compared to more mainstream alternative asset classes.
