Macula refers to the central portion of the retina, a light-sensitive layer of tissue at the back of the eye. The macula is responsible for central vision. Degeneration of the macula, which affects the central part of the retina (the macula) and results in distortion or loss of central vision, occurs most commonly after the age of 60 and is referred to as age-related macular generation (AMD). The macular degeneration treatment is used to treat macular degeneration eye disease and slow the disease and prevent severe loss of vision.
