

Richardson Plastic Surgeons on the Benefits of Laser Skin Resurfacing

The six surgeons of Regional Skin & Laser Center in Richardson and Sherman discuss the ways in which laser skin resurfacing can benefit the complexion.

RICHARDSON, TX, USA, March 13, 2024 /EINPresswire.com/ -- At Regional Skin & Laser Center, a [medical spa in Richardson](#), Rockwall, and Sherman, a team of experienced estheticians offers a plethora of sought-after non-

surgical treatments. The center is supervised by six board-certified plastic surgeons: Drs. Denton Watumull, Joshua Lemmon, Bruce Byrne, Chase Derrick, Chirag Mehta, and Derek Rapp. While procedures performed at the medical spa include cosmetic [injectables](#) and exfoliating facials, especially popular are the center's wide range of laser procedures, says Dr. Watumull. The practice employs several devices developed by Sciton®, an internationally-renowned laser manufacturer, including the Contour TRL and HALO® systems for [laser skin resurfacing](#).

Featured at medical spas around the world, laser skin resurfacing is a minimally-invasive treatment designed to enhance the complexion. The procedure, explains Dr. Rapp, aims to stimulate the mid-layer of skin (or the dermis) with concentrated light energy, which can prompt the outer layer of skin (the epidermis) to renew its collagen production. As a result, the doctors continue, laser skin resurfacing can:

- Produce a smoother, more even complexion
- Reduce the appearance of common age-related concerns (e.g. fine lines, wrinkles, age spots)
- Remove both atrophic (indented) and hypertrophic (raised) scars
- Address pigmentation issues, such as redness or sun damage
- Tighten loose or sagging skin

Additionally, says Dr. Derrick, many of the lasers used at Regional Skin & Laser Center are equipped with advanced settings that allow the provider to customize energy levels. The physicians also mention that the treatment is generally administered in a few short sessions, and extensive downtime is seldom necessary.

Moreover, the surgeons advise patients interested in laser skin resurfacing to seek out a qualified provider to administer the treatment. In their professional opinion, entrusting the procedure to a licensed esthetician or reputable medical spa can increase chances of a safe and successful experience.

About Regional Skin & Laser Center
