

# Thermal Lamination Films Market to Garner USD 2.25 billion by 2030, Grow at a CAGR of 8.2% Says Exactitude Consultancy

*Global Thermal Lamination Films: Protecting Prints with Heat-Activated Layers for Durable and Glossy Finishes*

LUTON, BEDFORDSHIRE, UNITED KINGDOM, March 13, 2024

/EINPresswire.com/ -- “Thermal lamination films are decorative films, which are extrusion coated with thermal adhesives. These films, when heated, melts the adhesives & sticks to the printed paper surface. Generally, thermal lamination films are of three main types that are biaxially oriented polypropylene (BOPP) based thermal lamination film, biaxially oriented polyethylene terephthalate based thermal lamination film (BOPET) and biaxially oriented nylon-6 based thermal lamination film (BOPA).”

The [Thermal Lamination Films](#) market is expected to grow at 8.2% CAGR from 2023 to 2030. It is expected to reach

above USD 2.25 billion by 2030 from USD 1.11 billion in 2023. Thermal lamination films are decorative films, which are extrusion coated with thermal adhesives. These films, when heated, melts the adhesives & sticks to the printed paper surface. Generally, thermal lamination films are of three main types that are biaxially oriented polypropylene (BOPP) based thermal lamination film, biaxially oriented polyethylene terephthalate based thermal lamination film (BOPET) and biaxially oriented nylon-6 based thermal lamination film (BOPA).

“

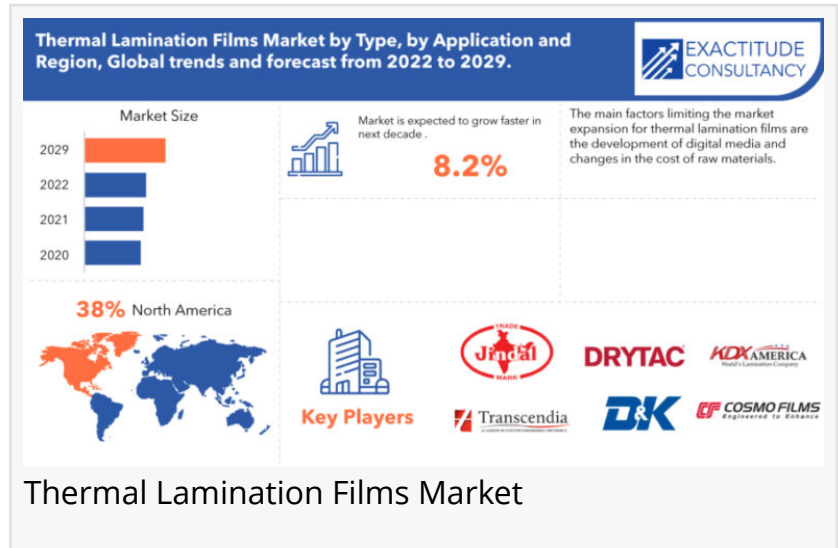

Thermal Lamination Films Demand: Growing popularity due to their durability, flexibility, and enhanced aesthetic appeal in packaging and printing industries.”

*Exactitude Consultancy*

Exactitude Consultancy:

Rise in demand for eco-friendly lamination and adoption of digital technologies offer lucrative business growth opportunities for lamination film manufacturers to cater to market competition as well as make a positive contribution to environmental preservation.

Leading players are continuously pushing the boundaries of technology to offer superior lamination solutions. Use of advanced lamination techniques, such as precision lamination, multi-layer lamination, and lamination of unconventional materials, are continuously redefining

the possibilities in the lamination films industry.

A lamination film is commonly manufactured by combining two or more plastic films such as polyethylene or polypropylene. The presence of multi-layer coating of a strong and durable adhesive makes the laminated film strong, durable, and resistant to physical damage. Lamination films are commonly used to protect the product during transportation, packaging, distribution, and storage. Furthermore, excellent barrier properties of the lamination film protects the product from external deteriorating agents such as moisture, gas, pathogens & spoiling agents, and prevents the loss of the product qualities, such as freshness and aroma in case of food.

According to the latest region-wise lamination films market demand analysis, Europe accounted for a major share of the global lamination films industry owing to the growing emphasis on sustainability and eco-friendly elements among manufacturers in the region. Furthermore, rise in innovation in digitalization and adoption of advanced techniques by lamination films suppliers and manufacturers is further boosting the usage of the lamination films beyond various conventional applications.

Significant growth of various sectors, such as pet products, cosmetics, food products, in Europe and rising preference for diverse materials, textured finishes, and special effects in laminations among consumers in the region are offering growth opportunities and transforming products not just into commodities but curated experiences.

- Major developments that can change the business landscape as well as market forecasts.
- Addition/refinement in segmentation-Increase in depth or width of segmentation of the market.
- Coverage of new market players and change in the market share of existing players of the Thermal Lamination Films market.
- Updated financial information and product portfolios of players operating in the Thermal Lamination Films market.
- Updated market developments of the profiled players.
- Any new data points/analysis (frameworks) which was not present in the previous version of the report

The new edition of the report consists of trends/disruptions on customer's business, tariff and regulatory landscape, pricing analysis, and a market ecosystem map to enable a better understanding of the market dynamics for Thermal Lamination Films.

□□□□□□□□□□ □□□□□□ □□□□□□□□ □□□ □□ □□□□□□:

- Country level market for Thermal Lamination Films market (up to 5)
- Profiling and additional market players (up to 5)
- Up to 40 hours of customization.
- post-sales support for 1 year from the date of delivery.

Please contact our sales professional ( sales@exactitudeconsultancy.com ), we will ensure you obtain the report which works for your needs.
