

Amplifying Digital Presence in the Construction Industry - March 14, 2024

SUNDRE, ALBERTA, CANADA, March 14, 2024 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

The Leaning Tower of Pisa, whose construction began in August 1173, faced multiple halts due to wars, debts, and efforts to correct its tilt, ultimately aiding its survival by allowing the soil beneath to compress. Completed in the mid-14th century, this bell tower is part of Pisa's cathedral complex, showcasing the city's historical significance as a seaport involved in military and trade endeavors. Despite attempts to correct its lean, the tower remains famous for its tilt, caused by an inadequate foundation on soft ground. This week's top video is courtesy of Practical Engineering who give us a review of the contractors, restoration experts, and engineers who have kept the tower standing for the next few centuries, at least.
